GUARANTEED CONTACT LENS SUCCESS PROGRAM

At Professional Eyecare Centers, we are dedicated to you having a completely healthy and enjoyable contact lens experience. We begin by performing a thorough Contact Lens Evaluation. This includes checking your visual acuities, Keratometry (measuring the corneal curvature), refraction to obtain your prescription, tear film and a complete evaluation of corneal and eye health in order to determine the correct parameters for each individual's needs. Also included in the fee for this evaluation is a full year of follow-up care for any contact lens related clinic visits, as well as replacement contact lenses should you lose or tear a lens before your year is complete.

Because contact lenses are considered a medical device and are only available with a current and complete prescription, the use of them is not without risk. Contact lens wearers can develop potentially serious complications which could lead to permanent eye damage and vision loss. That is why it is so important for you to be aware of the proper wearing and care instructions. These will be provided and explained in full by one of our contact lens specialists.

If you have never worn contact lenses before, in the beginning, it is normal if you experience any of the following symptoms:

- Your eyes itch or feel funny
- You have better vision in one eye
- You have trouble handling your lenses
- You are more aware of one lens
- Your vision seems more blurred than with your glasses

Remove your lenses IMMEDIATELY if you:

- Develop unusual pain
- Experience stinging or redness
- Have unusually blurred vision that does not clear
- Have any discharge or unusual light sensitivity

When in doubt, remove your lenses and call our office. Should you have any questions or concerns regarding your contact lenses, please don't hesitate to contact us. Professional Eyecare Centers guarantees that you will have a successful experience with your contact lenses. Thank you for allowing us the privilege of being your Eyecare and Eyewear provider.
